

BDA Practical No.6

-By Aditya Nikam(BE AI & DS)

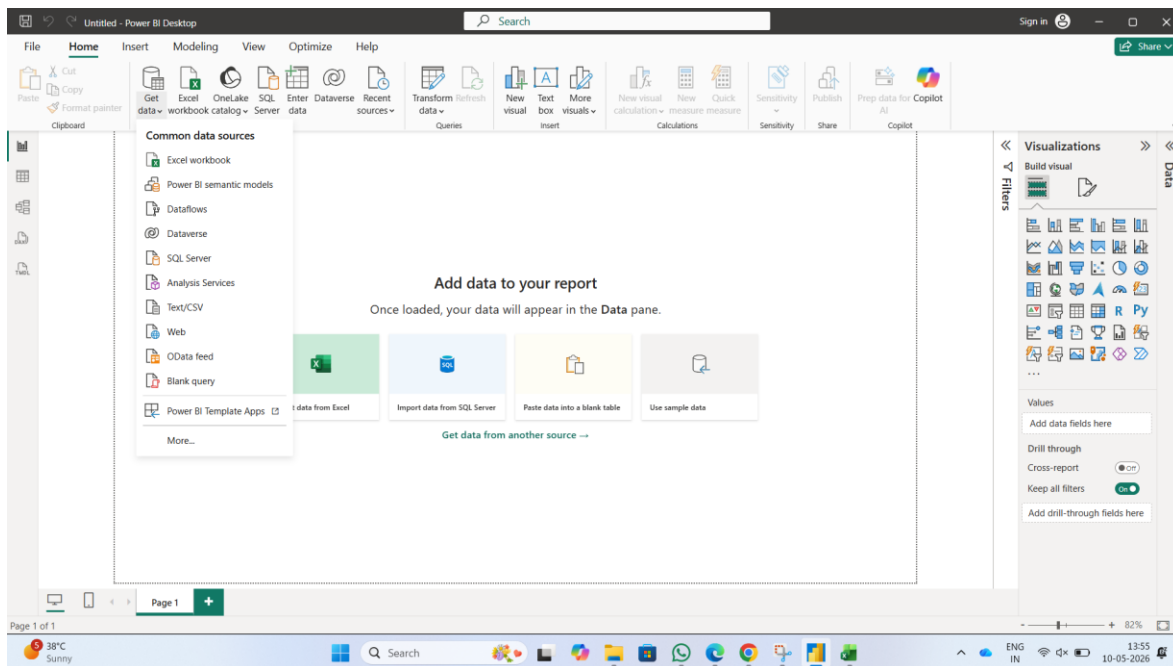

The dataset used in this practical is given below. You can click the link and download the dataset:-

<https://www.kaggle.com/datasets/rohitsahoo/sales-forecasting>

Step 1:-Open Power BI and Click on Blank Report

Step 2:-Now on the Home ribbon at the top, click on Get Data (the icon with the database and a green arrow) as your data will be .csv file so click on Excel Workbook from the drop down.

Step 3:-A preview window will appear. Do not click "Load" yet. Click Transform Data. This opens the *Power Query Editor*.

superstore.csv

18 COLUMNS, 999+ ROWS Column profiling based on top 1000 rows PREVIEW DOWNLOADED AT 15:10

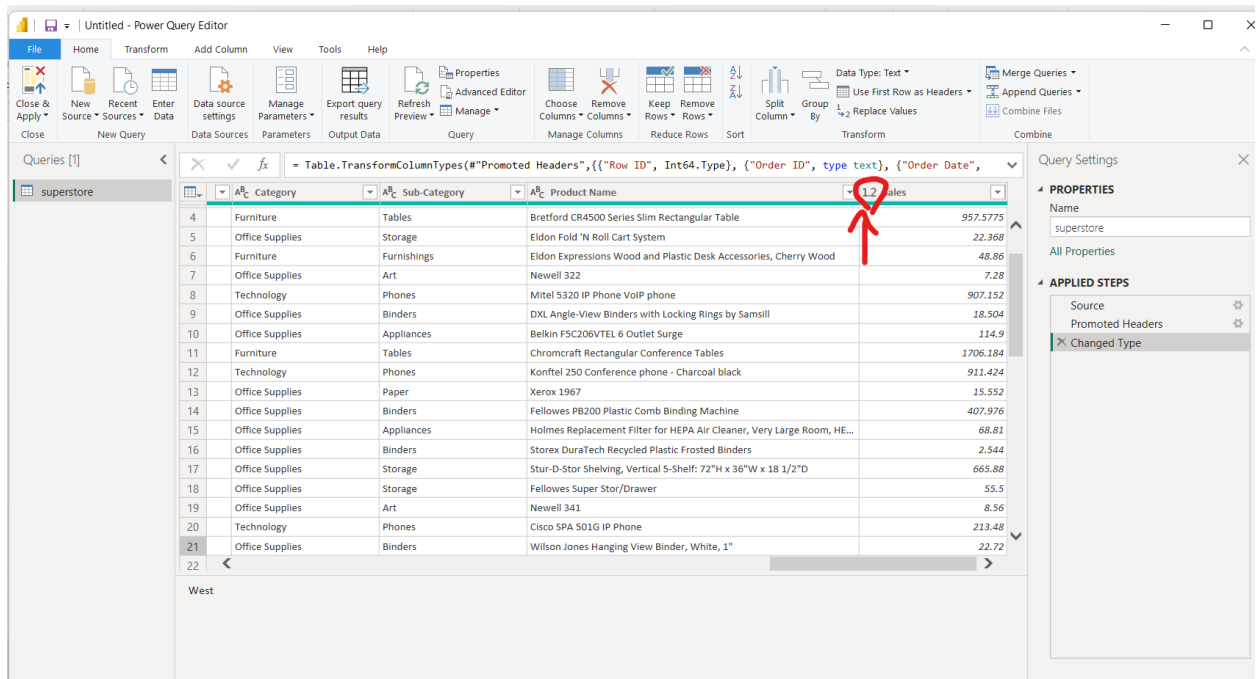

Step No.4-Check your Dates: Look at the Order Date column. If the icon next to the column name is ABC (Text), click on ABC and change it to Date. In the below image as you can see Calendar icon beside Order Date column means it's correct. If it was ABC icon means it is text and we would have to change it by clicking on ABC and then select Date

Check your Sales: Make sure the Sales column has a 1.2 (Decimal Number) icon next to it. In the below image Sales Column is also correct because 1.2 is there beside Sales in Sales Column

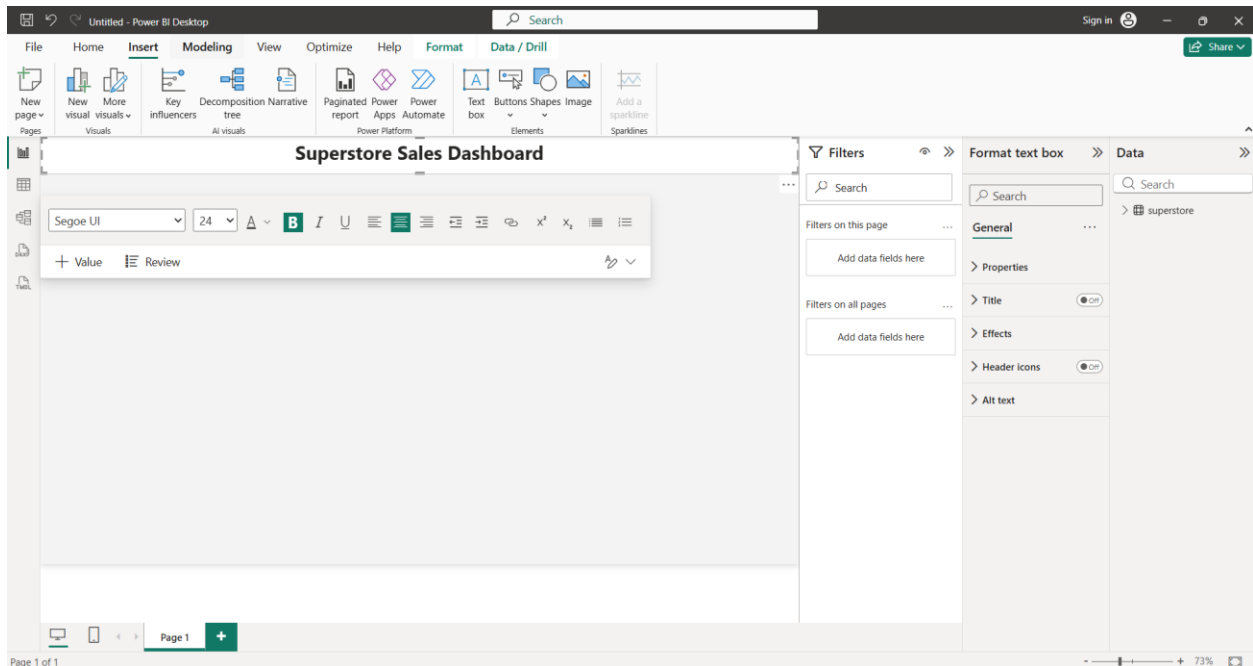

Step No.5:- Once everything looks good, click Close & Apply in the top left corner. Your data will now load into Power BI (you will see the columns listed on the far right under the "Data" pane).

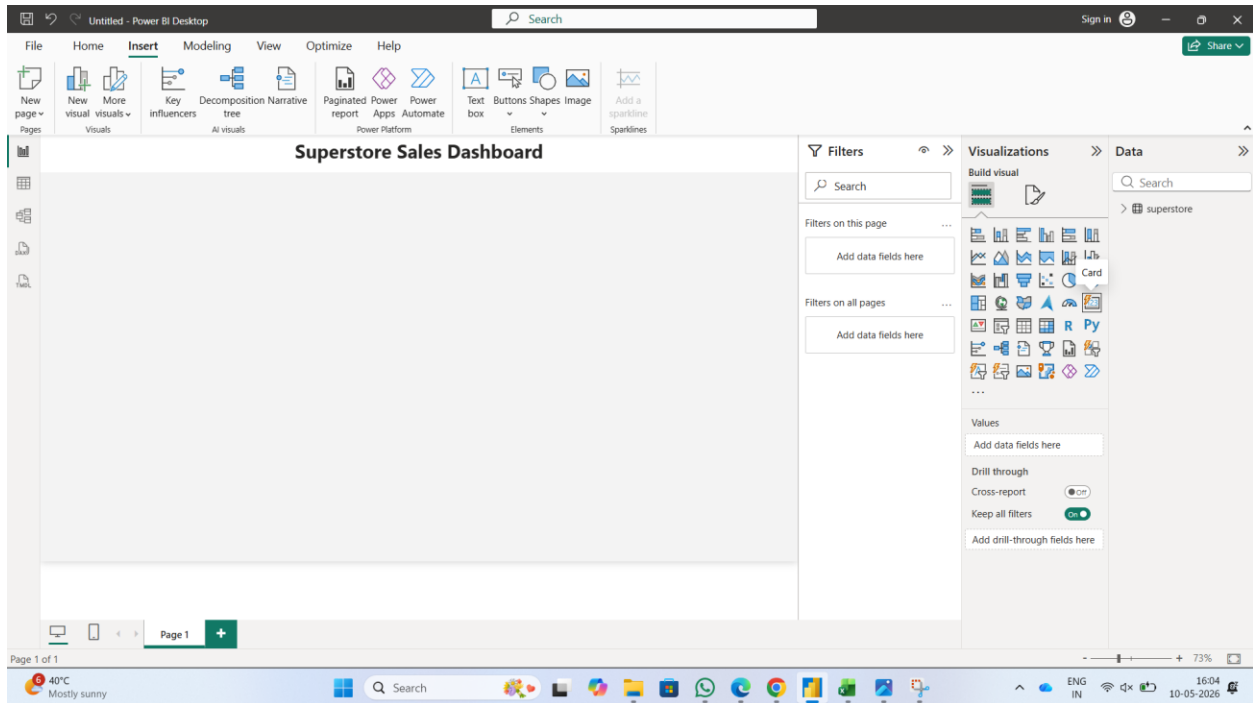

Step No.6:- Go to the Insert tab on the top ribbon and click Text box.

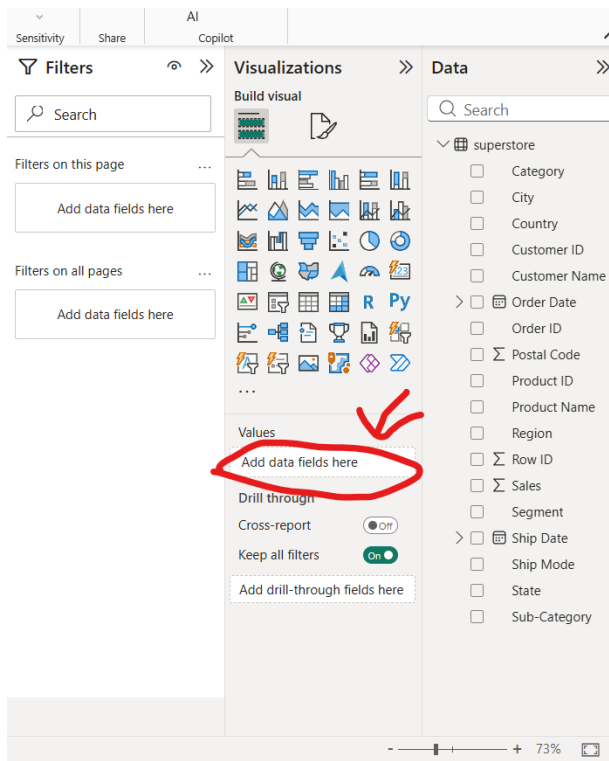

Step No.7:- Type "Superstore Sales Dashboard". Highlight the text, change the font size to 24, make it bold, and center it. Drag this text box to the top center of your canvas.

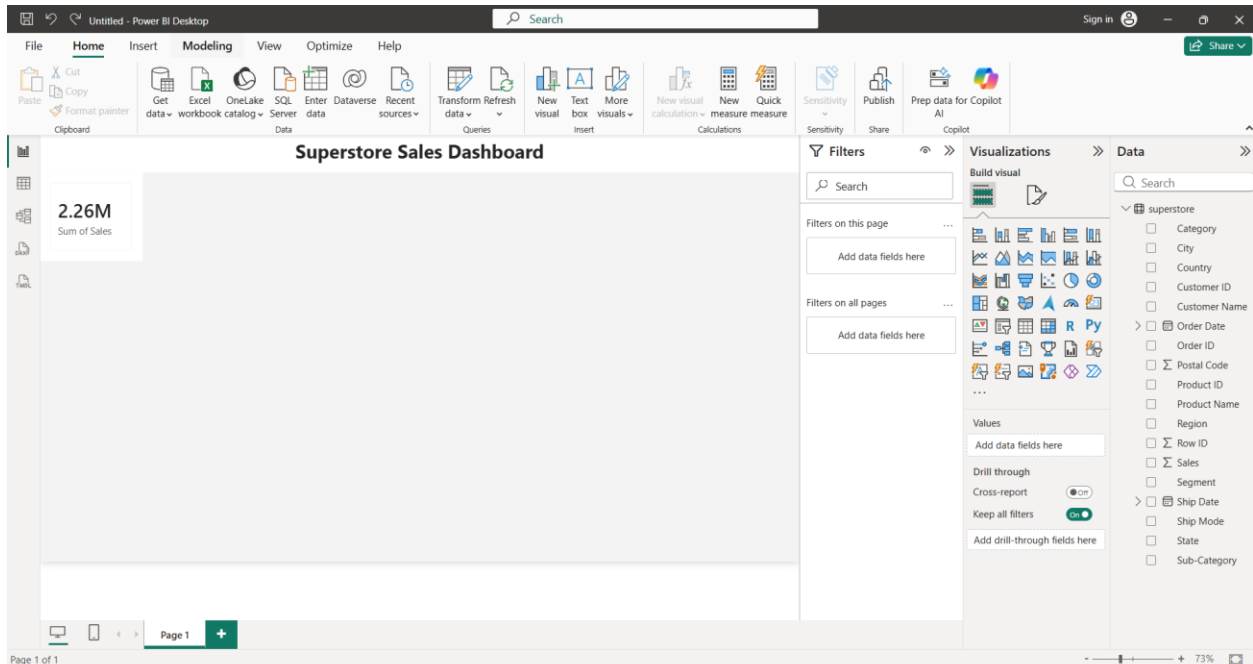

Step No.8:- In the Visualizations pane (middle right), click the Card icon (it looks like a rectangle with "123" on it).

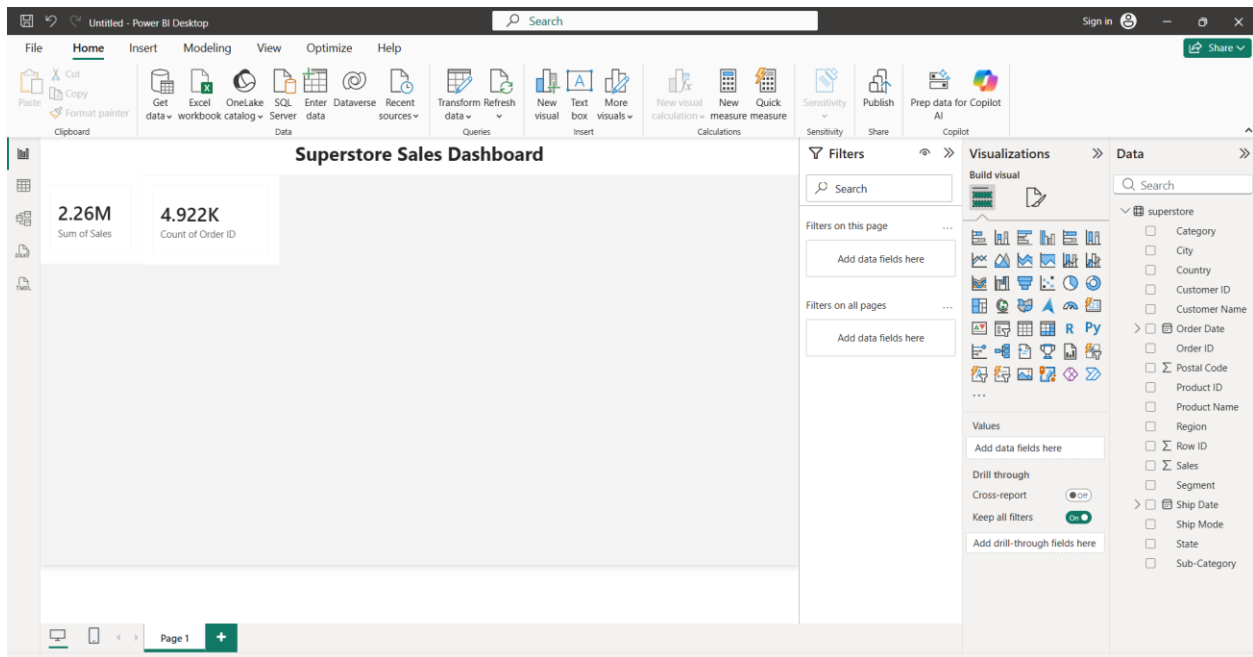

Step No.9- Drag the Sales column from the Data pane and drop it into the "Add data fields" box which is below Values. It will show your Total Sales.

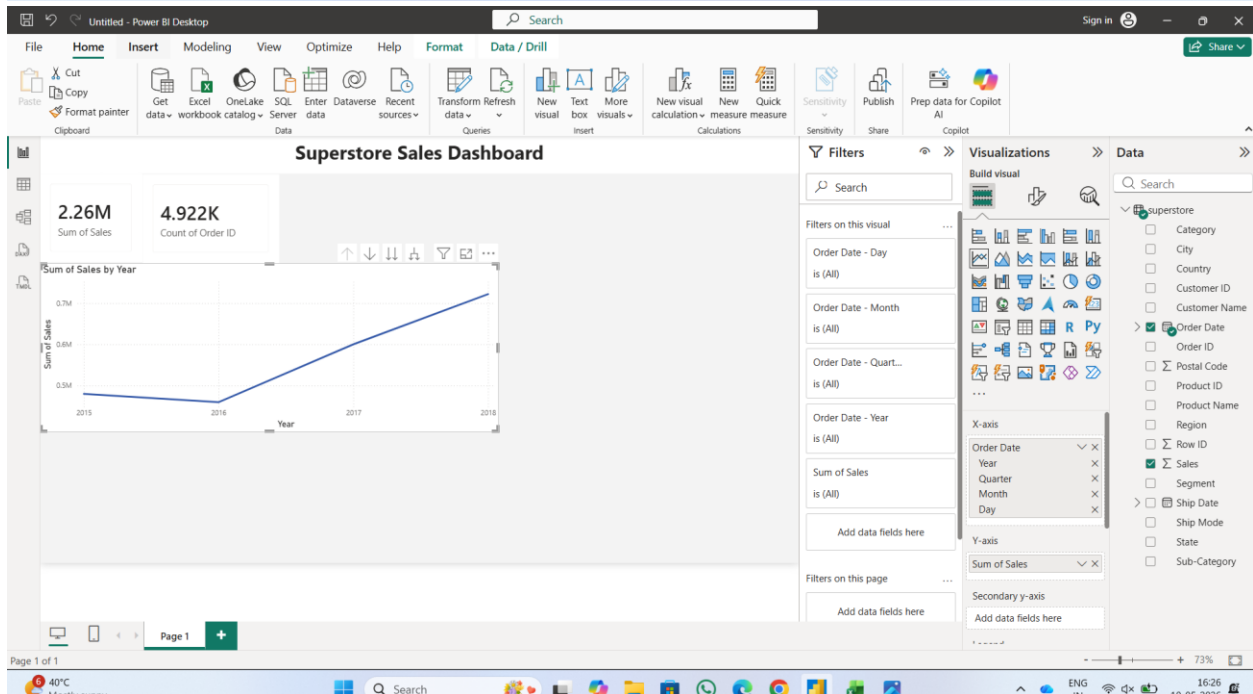

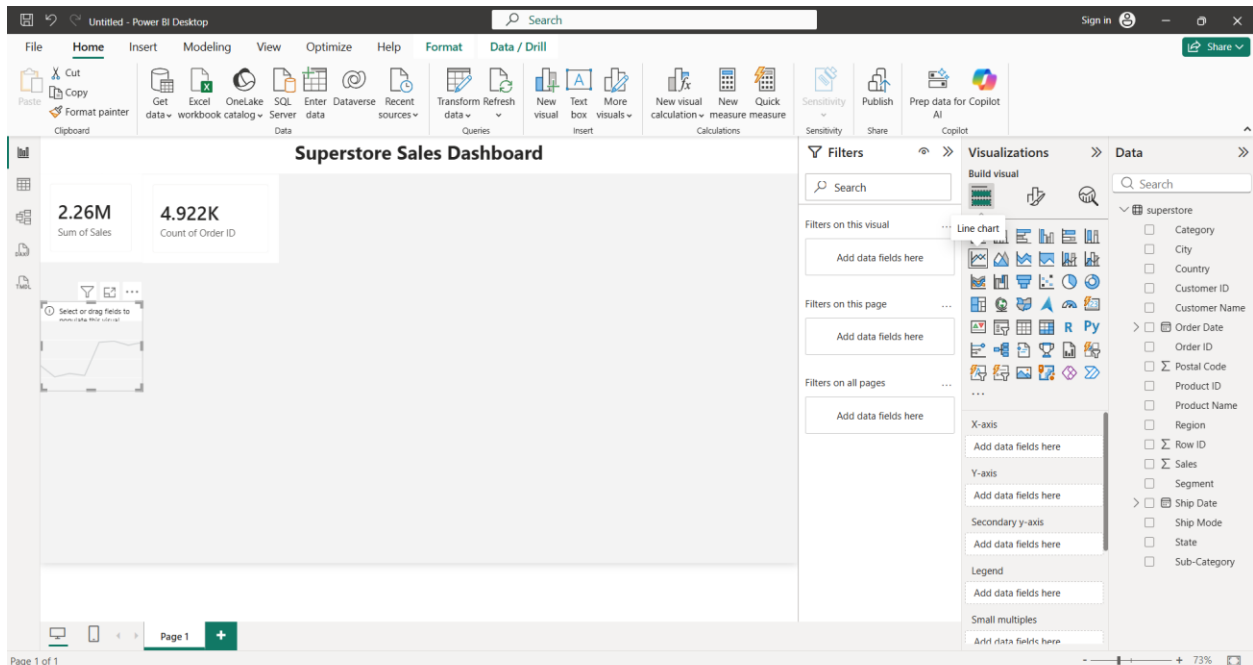

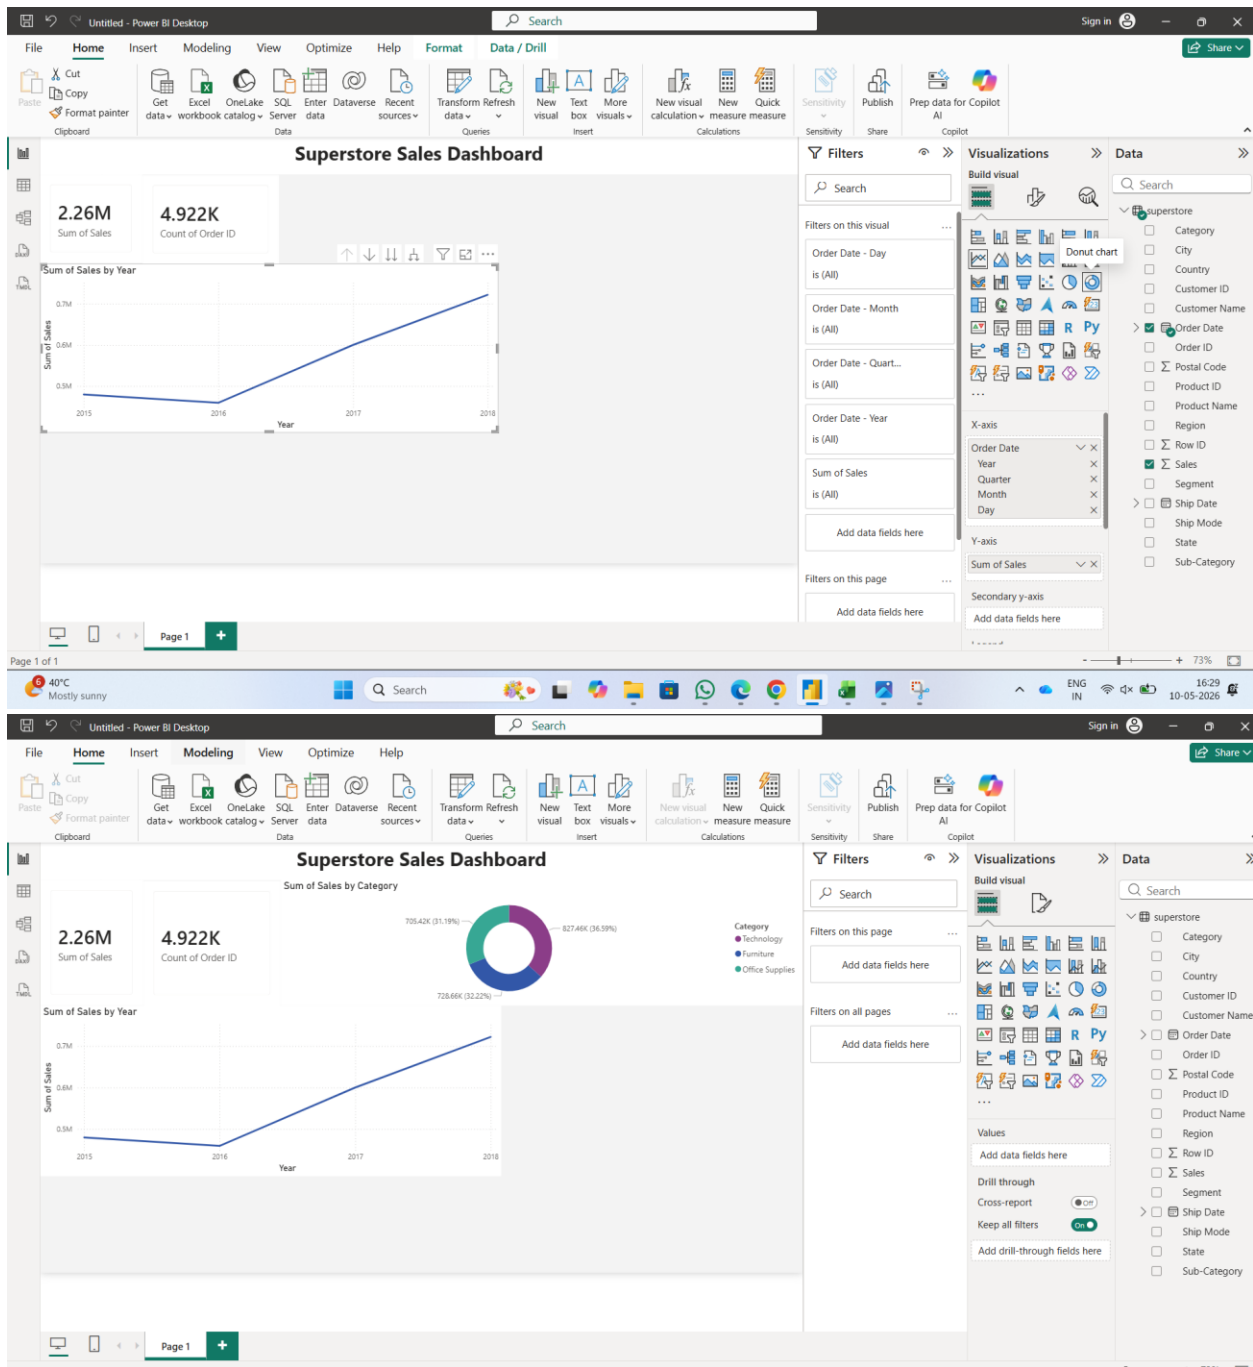

Step No.10:- Now Click on Blank Canvas and then click again on Card from the Visualization Pane and then drag Order ID from Data Pane into Add Data Fields Box. Click the little down arrow next to Order ID in the fields well and select Count (Distinct). This shows your total unique orders.

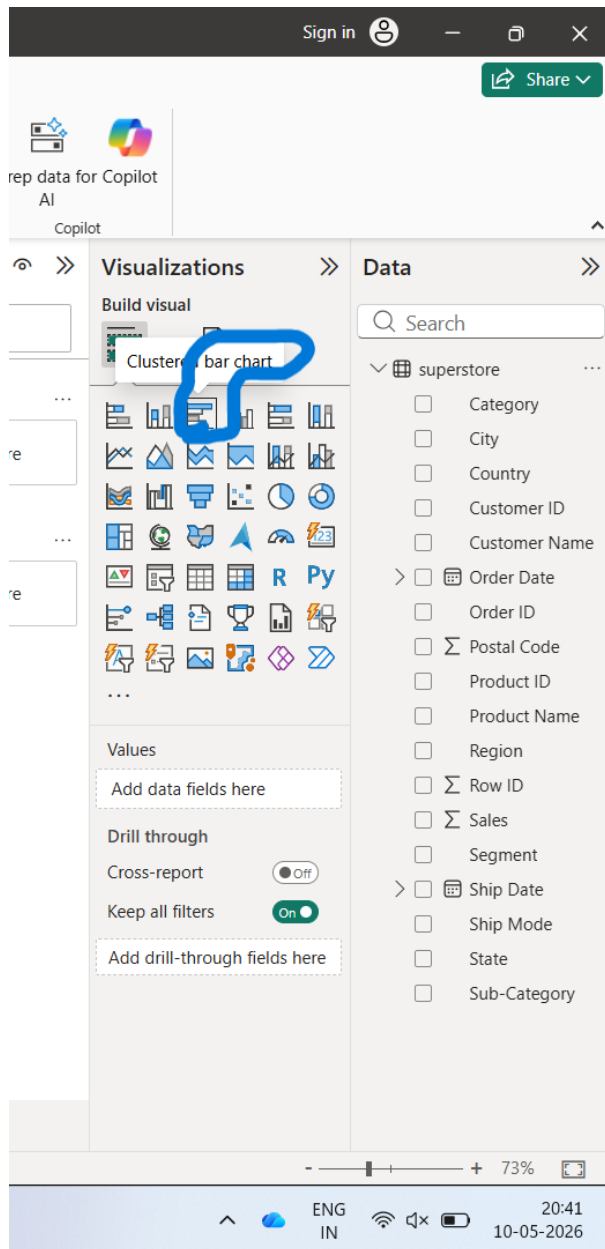

Step No.11:--Click the Line chart icon in the Visualizations pane. Drag Order Date to the X-axis. Drag Sales to the Y-axis. Under the Visualization Pane

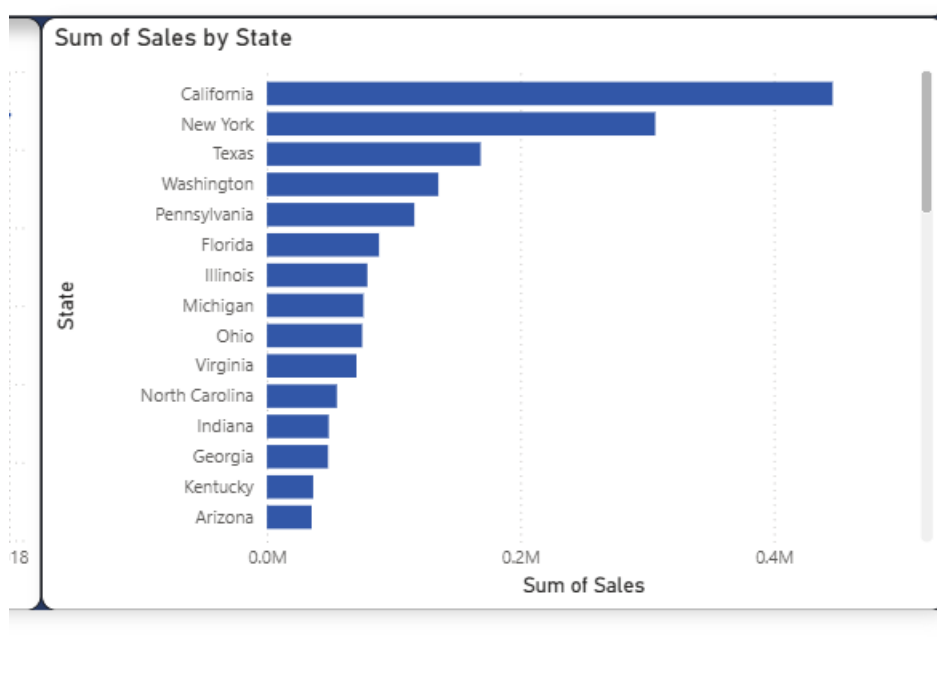

Step No.12:--Click a blank space on the canvas. Click the Donut chart icon. Drag Category to the "Legend" field. Drag Sales to the "Values" field.under the Visualization Pane

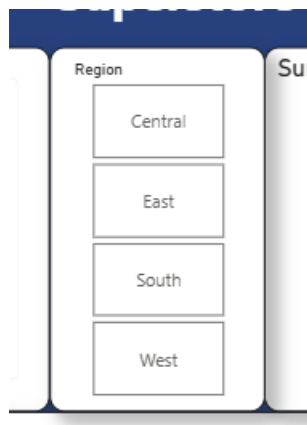

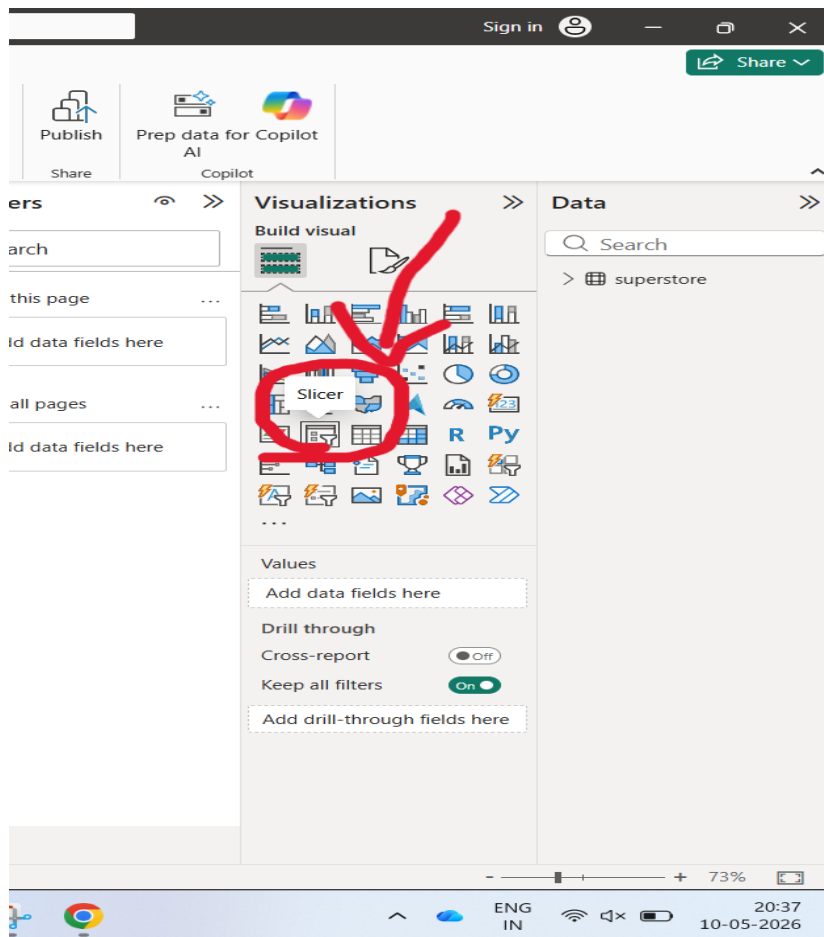

Step No.13:- Click a blank space. Select the Clustered bar chart (horizontal bars). Drag State to the Y-axis. Drag Sales to the X-axis. Place this in the middle-right.

Step No.14:- Click a blank space on the canvas. Click the Slicer icon in the Visualizations pane (it looks like a table with a funnel). Drag the Region column from the Data Pane into "Add data fields here" under Visualization Pane. With the slicer selected, go to the Format your visual pane (paintbrush icon) under Visualization pane then go to Slicer settings then click Style then Change from "Vertical list" to Tile. Place these interactive buttons near the top of your dashboard. If you click "South", all your charts will magically update to show only Southern sales!

Step No.15:-Now click on the background where “Superstore Sales Dashboard” is written. Then beside your Data Pane on right hand side you will see Format Text Box pane so in that under General Tab you will see Effects option expand it and change the color to Navy Blue. Now double click on “Superstore Sales Dashboard” Text on your Dashboard and change the font color to White.

Step No.16- Click on your Bar Chart. Go to the Format your visual pane (paintbrush icon) on the right. Under Visualization Pane. Then click General and then click Effects. Turn

Visual border ON, expand it, and set Rounded corners to 10 px Turn Shadow ON. While the Bar Chart is still selected, click the Format painter (the yellow paintbrush icon in the top left Home ribbon), then click your Donut Chart. Do this for all your charts and KPI cards to instantly apply the rounded corners and shadows to everything.

Step No.17:-The final dashboard will look like below:-
